CACI £55

Using a tiny micro-current, it helps to tone, lift and re-educate the muscles back to their original position. The treatment will stimulate the circulation of energy to the facial tissues and muscles. This increases the rate that the skin produces protein such as collagen and elastin and muscle tissue can be reconstructed. It therefore deals with both skin and the supporting muscle tissue beneath it. It restores form and vitality to the facial muscles that have gone soft due to lack of circulation.

Endermologie £39.00

Is a painless treatment that helps to increase blood and lymph circulation, thus promoting the elimination of metabolic waste .

THE RESULT : A SLIMMER, MORE CONTOURED BODY AND SMOOTHER (LESS CELLULITE), FIRMER SKIN

When the waste removal system starts to fail, waste products start building up and the connective tissue becomes saturated with fluid, and is often inflamed and swollen. Cellulite results from a build-up of fat in the adiposities(subcutaneous fat cells) and the retention of water in the surrounding areas. As the adiposities continue to grow, the envelopes containing them lose their shape and pull on their cutaneous anchoring points, giving the skin its "orange peel" appearance .

Does it work all over my body?

The changes are produced in the areas most in need without causing any decrease in volume in areas where such a decrease would be undesirable. In addition, Endermologie, through its relaxing and soothing action, has an indisputable stress-lowering effect.

Tanning £27.95

Fake Bake Gold system is known for its winning formula of special ingredients, and the even natural looking tan that gives you a beautiful colour, safely. The Fake Bake Gold system protects the skin from harmful effects of the environment. It contains two of the most powerful anti-oxidants, pomegranate and stable green tea, as well as vitamins A and E. Together, they counter the highly reactive free radicals in the environment, which are known to weaken the protective immune system and result in thinning skin, loss of elasticity, age spots and ultimately wrinkles. Fake Bake Gold is a complete salon professional tanning system and also available exclusively through salons for you to use at home. Any waxing or shaving must be done 24 hours prior to the appointment. Exfoliate the night before and loose dark clothing to be worn on the day of tanning.

In the ocean, seaweed forms the first line of the food chain, the only link realising the organic substance synthesis from mineral elements. Seaweed contains an amazing wealth of components, containing more than 40 active marine ingredients, mineral salts, oligo elements and vitamins. Pollution stress, fatigue, bad eating habits – the body suffers from all sorts of urban life aggressors. Due to this, vitamin and mineral deficiencies can occur which is then reflected in the state of the skin, hair or nails. Thanks to its rich natural wealth, seaweed can help the body find a balance, leading to increases in metabolic rates, harmonisation of the hormone functions, improvement in circulation, elimination of wastes and stimulation of the body's natural defences. These combined actions allow seaweed to regenerate body tissues, offering a new vitality and helping the person to rebalance and maintain a youthful appearance.
